

DataDiary: A practical solution for dentists from Miele Professional

## **Data management made easy: App for data transfer and reports**

**Gütersloh/Cologne, March 21, 2017. – Dentists are under obligation to document the successful reprocessing of their instruments. To assist with this task, Miele Professional is now offering a particularly time-saving solution based on an app. This receives cycle protocols automatically from a thermal disinfecter, allowing cycle reports to be generated at a tablet PC – without a cable, USB flash memory or any other intermediate steps.**

For employees in a dental practice, data transmission, approvals and data archiving is a repetitive task involving considerable effort. This typically begins with the transfer of data using a USB memory stick to the surgery's PC, capturing data from several consecutive cycles. And the more data needs to be saved, the longer the time spent away from more pressing tasks.

But now, Miele Professional has a simpler and faster solution. Using a new app called DataDiary, reprocessing data is transmitted straight from the thermal disinfecter to a tablet. This occurs immediately at the end of each process stage and without any intervention on the part of staff. The documentation as such is also performed by DataDiary. Each employee using the system is identified by a user ID.

'The fast and intuitive user interface of DataDiary is impressive, allowing surgery teams all the more time to get on with what really counts', says Michael Sedlag, Head of Medical Technology with Miele Professional. With this, Miele has further extended its holistic range of products for greater security and maximum convenience in dental practices. The app is available for the Android operating system and is compatible with all thermal disinfecters from Miele's current generation.

**Company profile:** Miele is the world's leading manufacturer of premium domestic appliances including cooking, baking and steam-cooking appliances, refrigeration products, coffee makers, dishwashers and laundry and floor care products. This line-up is augmented by dishwashers, washer-extractors and tumble dryers for commercial use as well as washer-disinfectors and sterilisers for use in medical and laboratory applications (Miele Professional).

The Miele company, founded in 1899, has 8 production plants in Germany as well as one plant each in Austria, the Czech Republic, China and Romania. 2015/16 turnover amounted to approx. EUR 3.71 bn with sales outside Germany accounting for around 70%. Miele is represented with its own sales subsidiaries and via importers in almost 100 countries. The Miele company, now in the fourth generation of family ownership, employs a workforce of around 19,100, 10,800 thereof in Germany. The company headquarters are located in Gütersloh/Westphalia, Germany.
