## New basket for bottles: Hygienic cleaning in Miele tank dishwashers

- ▶ Accommodates 8 bottles with a maximum height of 37.5 cm
- ▶ Docks onto water supply via injector nozzles

**Gütersloh, September 9, 2020. – Reusable glass bottles are increasingly used in hotels, restaurants, public institutions and further education – for example to serve juices at a breakfast buffet or offer welcoming drinks. To meet this demand, Miele is now offering a basket for use on three undercounter tank dishwasher models, allowing bottles, jugs and other large hollow items to be reliably washed both inside and out.**

Machine-based dishwashing is not only more efficient than washing by hand - it also guarantees certified hygiene in accordance with the DIN SPEC 10534 standard for commercial dishwashers. Eight bottles with a maximum height of 37.5 cm are securely accommodated in the new basket. It features injector nozzles which spray water into each individual bottle for full and complete coverage of all surfaces. Connection to the internal water supply is via an adapter supplied with the basket and replaces the lower spray arm in the machine.

All standard programmes on a tank dishwasher can also be used to wash bottles and jugs, including short programmes with cycle times of less than 1 minute. With integrated spray arm and filter monitoring, these machines feature additional safety functions which provide an early warning of potential faults and indicate these in the machine display. The bottle basket is easily fitted, allowing crockery, pots and pans, cutlery and glassware to be washed in one and the same unit.

Professional). The Miele company, founded in 1899, has eight production plants in Germany as well as one plant each in Austria, the Czech Republic, China, Romania and Poland. These are joined by the two plants belonging to Miele's Italian medical technology subsidiary Steelco. Turnover in the 2018/19 business year was around € 4.16 bn, with a share of business outside Germany of approx. 71%. Miele is represented with its own sales subsidiaries and via importers in almost 100 countries/regions. Throughout the world, the family-run enterprise, now in its fourth generation, employs a workforce of around 20,500, whereof 11,050 are employed in Germany. The company has its headquarters in Gütersloh in Westphalia.
