MasterLine fresh water dishwashers from Miele make light work of providing hygienically clean crockery in the office

- ▶ New model generation with intuitive touch controls
- ▶ Connection to Miele MOVE online portal

Gütersloh, January 4, 2023. – Wherever hygienically clean crockery is needed again in next to no time, the new commercial dishwashers from Miele's MasterLine series are the products of choice: The proven fresh water system takes in fresh water for each phase of the programme and uses high temperatures to remove soil and reliably deal with viruses and bacteria. These models are ideal for office kitchens.

Thanks to their large touch display, all models from the MasterLine series are intuitive to use. M Touch Basic and M Touch Flex represent two sets of controls giving fast access to favourites and allowing individual adjustment to programmes – intuitive thanks to plain text, symbols and 32 languages. The M Touch Flex version with its colour display takes user convenience to the next level. For example, programme names can be changed in order to eliminate operating errors. The individual stages of operation are explained in short, informative sequences.

The new dishwashers remove 99.999% of most bacteria, even in the 'Super Short' programme with its cycle time of only 5 minutes. For verifiable and above-average virucidal efficacy, the Institute for Integrative Hygiene and Virology – InFLuenc_H has awarded this series its Virus Seal of Approval in Gold.

Special-purpose baskets for different types of crockery

All models offer ample space on two rack levels. Matching baskets guarantee a secure hold for crockery, even larger items such as pizza plates. There is also a suitable basket for up to 16 bottles or other items such as thermos flasks or vases, guaranteeing thorough cleaning on the inside.

Several models feature Miele's innovative Dry+ technology. This active drying system extends programmes by 8 minutes and dispenses with the need to use a tea-towel, reducing the workload of staff. Without the least manual intervention, plates, cups and cutlery are ready for use again in next to no time, even if they consist entirely or partly of plastics.

Order cleaning chemicals online

The new MasterLine dishwashers connect to the Miele MOVE online portal. Practical: Detergents can be ordered via a direct link to the Miele Professional shop from a PC, smartphone or tablet. Yet another practical feature: Error messages can, if the operator so wishes, be sent direct to a designated contact in Miele Service or to a certified Miele service agent, without having to pick up the phone.

MasterLine dishwashers can also be installed in a tall unit. These models meet all the provisions of the European Machinery Directive, which is essential if machines are to be used in a commercial environment, and they are made from durable materials. Tested for 28,000 cycles, these machines guarantee spotless crockery for many years.

Company profile: Miele is the world's leading manufacturer of premium domestic appliances including cooking, baking and steam-cooking appliances, refrigeration products, coffee makers, dishwashers and laundry and floor care products. Their product portfolio also includes dishwashers, air purifiers, washing machines and tumble dryers for commercial use as well as washer-disinfectors and sterilisers for use in medical and laboratory applications. Founded in 1899, the company has eight production plants in Germany, one each in Austria, the Czech Republic, China, Romania and Poland as well as two production plants belonging to its Italian medical technology subsidiary Steelco. Sales in the 2021 business year amounted to around € 4.84 bn. Miele is represented with its own sales subsidiaries and via importers in almost 100 countries/regions. Throughout the world, the family-run enterprise, now in its fourth generation, employs a workforce of around 22,300, of which approx. 11,200 employees work in Germany. The company has its headquarters in Gütersloh in Westphalia.
