Everything under control while on the go: Miele MOVE portal monitors laundry machines

- ▶ Time and cost savings and simple contact to Miele
- ▶ Monitoring and saving key process data

Gütersloh/Berlin, September 19, 2023. – Which washing machines are running? When is the dryer finished? How high is consumption? Answers to questions such as these are provided live by the Miele MOVE portal. This digital solution for use on a PC and mobile devices simplifies multiple work processes associated with contract cleaning and is available for all Miele laundry machines from the Little Giants and Benchmark generation – catering for load capacities of 6 to 20 kg (washing machines) or up to 44 kg (dryers).

Where necessary, relevant messages are sent direct to a smartphone or tablet, for instance informing users when a washing machine or dryer can be unloaded. This saves a lot of legwork on the part of staff. Miele MOVE also allows the monitoring of the key process data which is essential in producing hygienically clean mops and cleaning cloths, for example temperatures and running times. Programme data is also quickly exported and saved. This, for instance, allows proof to be furnished that disinfection programmes were successfully completed. In addition, further economies can be pinpointed by archiving and evaluating operating data.

Yet another practical feature: Error messages are sent direct by the client, consent permitting, to a designated contact in Miele Service or to a certified Miele service agent, without having to pick up the phone. Thanks to the data transmitted, the cause is immediately visible to staff, facilitating a fast and targeted remedy – either in the form of a service visit by a trained technician with the necessary parts on board or self-help instructions over the phone.

The use of the basic version of Miele MOVE is free of charge. A monthly charge is only levied from 4 users per installation upwards.

Company profile: Miele is the world's leading manufacturer of premium domestic appliances including cooking, baking and steam-cooking appliances, refrigeration products, coffee makers, dishwashers and laundry and floor care products. Their product portfolio also includes dishwashers, washing machines and tumble dryers for commercial use as well as washer-disinfectors and sterilisers for use in medical and laboratory applications. Founded in 1899, the company has eight production plants in Germany, one each in Austria, the Czech Republic, China, Romania and Poland as well as two production plants belonging to its Italian medical technology subsidiary Steelco. Sales in the 2022 business year amounted to around € 5.43 bn. Miele is represented with its own sales subsidiaries and via importers in almost 100 countries/regions. Throughout the world, the family-run enterprise, now in its fourth generation, employs a workforce of around 23,300, of which approx. 11,900 employees work in Germany. The company has its headquarters in Gütersloh in Westphalia.
