Flexibility in a Small Space: Miele Presents Under-Counter Refrigerator with Double Drawer

- ▶ Cellar Compartment with Flexible Cooling Between 0 to 14 °C
- ▶ Practical Placement Next to the Stove for Easy Cooking Processes
- ▶ Timeless and Space-Saving Design: Ideal for Urban Kitchen Concepts

Gütersloh/Rödinghausen, September 19, 2025 – Whether fresh ingredients for a cooking evening or cool drinks for guests: The new under-counter refrigerator KU 7175 D from Miele brings flexibility and comfort to the kitchen. Two spacious drawers with individually adjustable temperature zones ensure clear storage directly next to the stove. The compact and versatile cooling option is ideal as a cellar compartment, beverage cooler, or supplement to the main refrigerator.

The two separate drawers can be flexibly adjusted to temperatures between 0 °C and 14 °C. This makes it possible to cool drinks close to 0 °C in the lower compartment, while vegetables are kept fresh above at around 14 °C. Especially for households without a cellar, the device offers a practical solution for clearly storing supplies such as potatoes, Mediterranean vegetables, or citrus fruits. The integrated “VeggieBox” creates additional order, while “DynaCool” ensures even temperature distribution throughout the cooling space. This keeps all ingredients fresh longer and preserves their full flavor.

Modern Design, Practical Placement

With a niche height of 86 to 92 centimeters, the under-counter refrigerator fits seamlessly into existing kitchen concepts, ideally near the stove. This allows fresh ingredients to be quickly retrieved and processed while cooking, without detours to the main refrigerator. The device is also comfortably usable as additional storage space for frequently needed products or as a separate beverage cooler for parties.

“With the new under-counter devices, we offer a smart cooling solution for everyone who values freshness, accessibility, and practicality in a compact space,” says Holger Keisinger, Senior Vice President of the Business Unit Refrigeration at Miele. “The flexible use and integration directly at the stove make this device a comfort gain in everyday life.”

Intuitive Control and Smart Networking

The control of the cooling drawers is conveniently done via the “FreshTouch” display. This allows the temperature to be intuitively adjusted with just one fingertip. Control is also possible via the Miele App*. Additionally, the “SoftClose” function of the drawers provides further comfort in everyday life.

The under-counter refrigerators will be available in stores from spring 2026.

*This is a separate digital offer from Miele & Cie. KG. The range of functions can vary depending on the model and the country. Acceptance of the Terms and Conditions and Privacy Policy for Miele digital products & services in the Miele app required. Miele reserves the right to change or discontinue the digital offer at any time.
