Innovation

Precise performance

Innovation has a long and very exciting tradition at Miele Professional. This is demonstrated by an impressive series of developments since the company first presented commercial laundry equipment early in the last century. Today, Miele Professional leads the way in the development of cutting edge technology and is capable of meeting the highest demands and standards in all commercial applications involving laundry processing; dishwashing; cleaning and disinfection. Innovative design, ground-breaking processes, durability and economic operation are just some of the subjects of high praise from both experts and satisfied users. Miele's pioneering spirit is expressed in many details – often fulfilling expectations users are yet unaware of.

Perfection

System performance

Efficient, professional laundry care is a key element in the daily work carried out in hotels, restaurants, small businesses and care homes, leading to the saving of both time and finances.

With modern, sophisticated products, Miele Professional offers a complete system of perfectly matching laundry machines for washing, tumble drying, ironing and, if required, disinfection. All with machine capacities and performance to suit a wide range of applications. Washing and care programmes are available for almost all types of textiles, including some especially developed for a whole range of soiled workwear.

At the same time, it is surprisingly simple and straightforward to operate the machines. Many details, such as the patented Miele honeycomb drum, guarantee excellent but gentle laundry care. The proverbial durability of Miele machines ensures extremely low lifetime costs.

PT 7136 and PW 6065

Miele's Little Giants excel not only because of their sophisticated design, but also as a result of their excellent performance. Intelligent and easy-to-use controls offer the right programmes even for the most stubborn stains. At the same time, the honeycomb drum ensures textiles retain their value, perfect shape and appearance during both washing and drying.

Little Giants – an investment in fast laundry turnaround – thanks to extremely short programme cycles.

Economical performance

Fast, thorough, economical: this is how our dishwashers are expected to be when coping with daily loads of crockery in hotels, restaurants, canteens and other catering operations. However, individual requirements vary greatly according to the size of operation, the amount of crockery to be processed and the type and degree of soiling.

Miele Professional offers commercial dishwashers to meet all needs and, in addition to excellent performance and economic operation, also provide the highest level of hygiene and, where appropriate, infection control.

Tank dishwashers for large commercial kitchens and freshwater machines for small catering establishments ensure smooth, trouble-free operation.

Miele through-feed tank dishwashers are able to efficiently process more than 1000 plates per hour, thanks to the development of innovative spray arm technology. Miele freshwater machines also set new standards. There are special programmes cross matched to specific needs with short cycle times for thorough, fast and economical performance.

G 8072, G 8066, PG 8067, G 7856

Tank or freshwater system, large or small capacity, Miele Professional has the ideal machine to meet every requirement. Miele commercial dishwashers are especially fast, economical and always ready to achieve thorough cleaning results. The dishwashers are complemented perfectly by baskets and inserts tailored to the specific needs of various types of glassware, plates, pots and pans, cutlery, crockery and trays.

Precision

Safe performance

Eliminating risks is of the essence in the cleaning and disinfection of medical instruments and laboratory glassware. Systematic reprocessing in suitable washer-disinfectors, using wash programmes developed for specific loads and types of soiling, is the ideal prerequisite for the protection of patients and personnel.

For decades, Miele Professional has set the benchmark in the development of suitable systems for hospitals, clinics, dental practices and laboratories. Different models, available in a choice of sizes and designed to meet the most varied performance requirements, can be equipped with a multitude of purpose designed baskets and inserts to meet the precise needs of a variety of specialist applications.

Additionally, the OXIVARIO and ORTHOVARIO programmes developed by Miele ensure optimum cleaning and disinfection, and are perfectly adaptable to the processing of instruments and laboratory glassware.

G 7835 CD

The G 7835 CD is characterised by safety, economic operation and process validation. Furthermore installation is possible under a worktop to save space. A wide range of baskets, inserts and programmes makes the G 7835 CD suitable for processing both laboratory glassware and surgical instruments.

Service

Customer service

Miele Professional offers important, pre-investment assistance, requirement analysis, economic feasibility studies and tailored site layout plans. Miele's service package offers peace of mind and lets customers get on with their daily work: service contracts ensure minimum downtime with the reassurance that a comprehensive service network guarantees that customer problems are dealt with rapidly. And high expectations are always welcome. Miele Professional Service is available both to validate Miele machines and to create tailor-made solutions to meet the specific needs of customers. The combination of Miele Professional system solutions geared to customer requirements, and reliable customer service, guarantees safe, smooth, trouble-free operation and produces results from which commercial users profit greatly.
